

# CREATE A MEDIA LANDSCAPE SCENE WITH CONSTRUCTION PAPER

1.
  - Use coloured construction paper 22.9 cm x 30.5 cm.
  - Choose the colour of paper you want for the sky.
  - Divide it into thirds horizontally – 7.6 cm sections.
    - choose bright green for the foreground
    - choose a softer green or brown for the middle ground
    - choose a soft blue or violet for the background

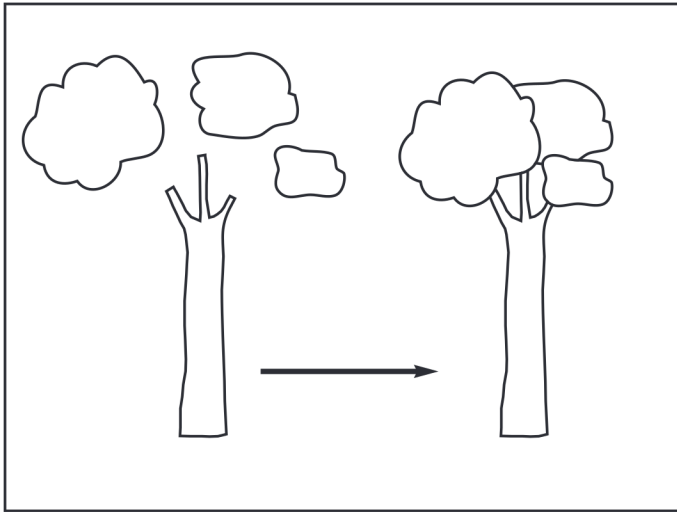

2.
  - Cut the coloured paper into strips for each section.
  - Cut the middle ground strip slightly wider – about 8 cm.
  - Cut the foreground strip about 7.6 cm wide with a slightly wavy edge.
  - Cut the background strip about 3 cm wide that keeps changing to about 2 or 1.5 cm wide with a wavy edge that look like distant hills.

3.
  - Glue the middle ground paper onto the sky coloured paper first.

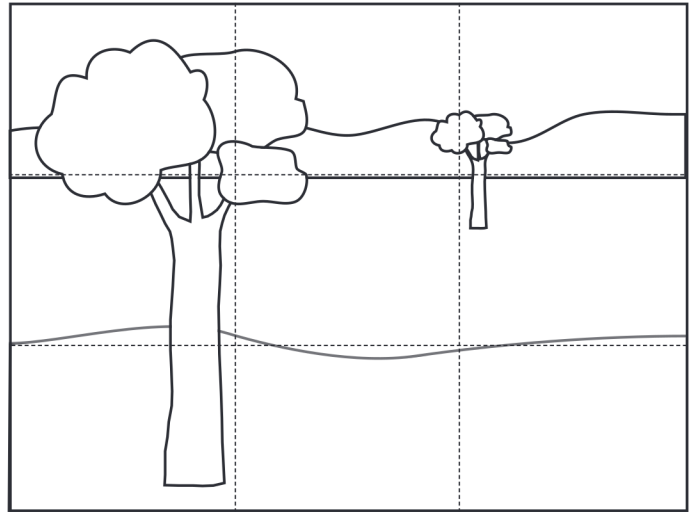

4.
  - Let the foreground paper overlap the middle ground paper slightly, and glue it in place.
  - Let the background paper overlap the middle ground paper slightly, and glue it in place.

# CREATE A MEDIA LANDSCAPE SCENE WITH CONSTRUCTION PAPER

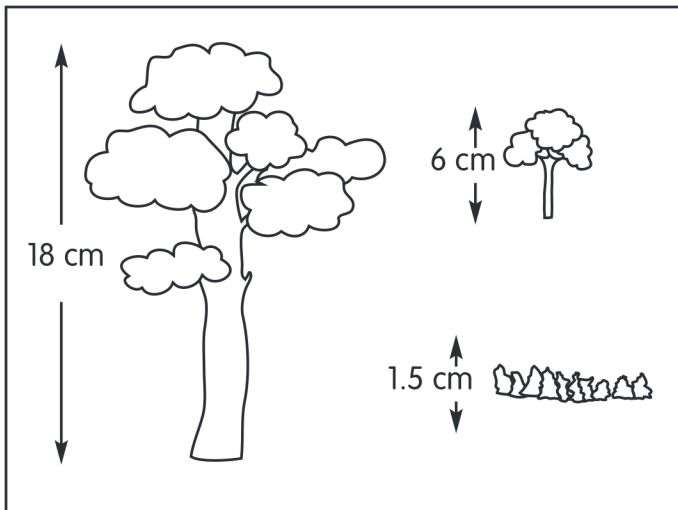

## BASIC TREE

- Cut out a trunk with 3 short branches at the top.
- Cut out 3 organic shapes – 1 big, 1 medium and 1 small.
- Glue the organic shapes to the short branches on the trunk.
- Make a big tree about 18 cm tall.
- Make a small tree about 6 cm tall.

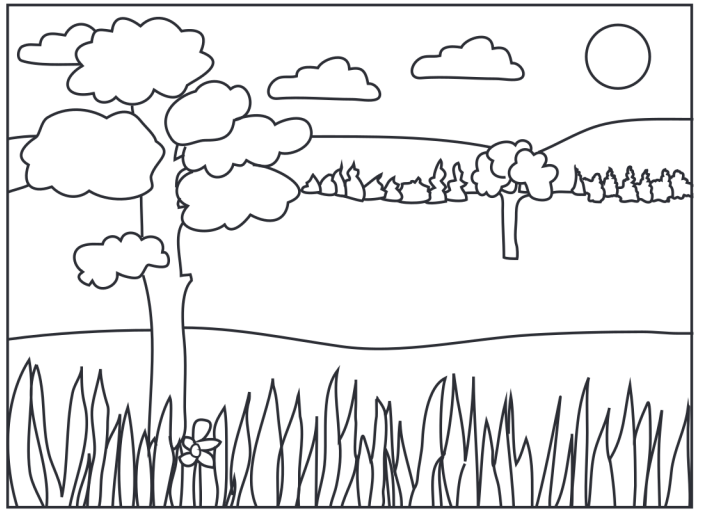

## BASIC LANDSCAPE SCENE

- Think of the paper divided into thirds.
- Place the big tree in the third on the left with the base of the trunk close to the bottom of the paper. Glue it in place.
- Place the small tree in the third on the right and half way up the paper. Glue it in place.

## DETAILS

- Use the same technique to make 3 sizes of trees.
- Add more organic shapes to the big tree.
- Cut out paper shapes to represent grasses, clouds, sun and other details.

## DETAILED LANDSCAPE SCENE

- Place the big tree in the foreground.
- Place the medium size tree in the middle ground.
- Place the smallest trees in the background.
- Glue all the shapes in place.
